Reality Quiz for the Course *Modelling for Combinatorial Optimisation*

1. Do I have to download (or buy) and study a textbook?
2. Are the lecture slides self-sufficient?
3. Do I have to attend the guest lecture?
4. Will there be lab sessions with small exercises?
5. How many of the 3 help sessions per assignment should I attend?
6. How many hours am I expected to work per assignment?
7. Do the TAs show us how to solve the assignments?
8. How many percent of the assignment and project tasks must we address?
9. On how many of the 3 assignments and project can we fail or get 0p?
10. On how many of Assignments 2 & 3 can we get 1 or 2 of 5p?
11. Do we have to follow the skeleton report?
12. Do we have to use LaTeX for assignment and project reports?
13. Is learning LaTeX within the course time budget of 133.3h?
14. Can we use or rephrase the output of generative AI tools in our reports?
15. Are the head teacher and TAs out to defeat us?

Reality Quiz for the Course *Modelling for Combinatorial Optimisation*

1. Do I have to download (or buy) and study a textbook? No, and there is none!
2. Are the lecture slides self-sufficient? No, only if I attend and take notes!
3. Do I have to attend the guest lecture? Yes, and maybe you are recruited?!
4. Will there be lab sessions with small exercises? Not after the first week!
5. How many of the 3 help sessions per assignment should I attend? At least one!
6. How many hours am I expected to work per assignment? Average 21h/teammate!
7. Do the TAs show us how to solve the assignments? No, only at solution sessions!
8. How many percent of the assignment and project tasks must we address? 100%!
9. On how many of the 3 assignments and project can we fail or get 0p? Zero!
10. On how many of Assignments 2 & 3 can we get 1 or 2 of 5p? One, but 5..10 sum!
11. Do we have to follow the skeleton report? Yes: it yields faster writing & grading!
12. Do we have to use LaTeX for assignment and project reports? No, but it is advised!
13. Is learning LaTeX within the course time budget of 133.3h? No, but it pays off!
14. Can we use or rephrase the output of generative AI tools in our reports? No!
15. Are the head teacher and TAs out to defeat us? No, we want to teach!
